DETAILED ACTION

Status Of Claims

1. This Office Action is in response to an amendment received 12/16/2009 in which Applicant lists claims 2-12, 14, 16-26 and 28 as being original, claim 15 as being previously presented, and claims 1, 13 and 27 as being currently amended. It is interpreted by the examiner that claims 1-28 are pending.

2. **It is noted that although claims 29 and 30 were not listed, they should have been listed as cancelled. Therefore, applicant is reminded that a complete listing of the claims must be included or the amendment can be held as non-compliant.**

Drawings

3. The amendments to the specification were received on 12/16/2009. These amendments are accepted. The objections to the drawings cited in the office action mailed 10/27/2009 are hereby withdrawn.

Specification

4. The amendments to the specification dated 12/16/2009 are accepted. The objections to the specification cited in the office action mailed 10/27/2009 are hereby withdrawn.

Allowable Subject Matter

5. Claims 1-28 are allowed.

6. The following is an examiner's statement of reasons for allowance:

Art Unit: 2872

Claim 1 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest an apparatus for providing a light beam with spatially varying polarization comprising polarized light reflected from one reflector and passing through the polarizer before it reaches the other; whereby a non-polarized light beam incident along a given axis on one of the reflectors is radially reflected off that reflector, acquires predetermined polarization by passing through the polarizer and is then reflected off the second reflector to produce an outgoing light beam of spatially varying polarization, as generally set forth in claim 1, the device including, in combination with the totality of the particular limitations recited in the remainder of claim 1. Claims 2-14 depend from claim 1 and therefore are allowable for at least the same reasons as claim 1.

Claim 15 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest a method for providing a light beam with spatially varying polarization comprising providing a polarizer positioned in an optical path between the two reflectors, for polarizing light reflected from one reflector before it reaches the other; and directing a non-polarized light beam along a given axis onto one of the two reflectors, so that it is reflected off that reflector to the other reflector, acquiring predetermined polarization as it passes through the polarizer, and reflected off the other reflector as an outgoing light beam, whereby the outgoing beam acquires varying spatial polarization, as generally set forth in claim 15, the device including, in combination with the totality of the particular

Art Unit: 2872

limitations recited in the remainder of claim 15. Claims 16-28 depend from claim 15 and therefore are allowable for at least the same reasons as claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

7. Applicant's arguments, see pages 11-13, filed 12/16/2009, with respect to the rejections of the claims have been fully considered and are persuasive. The rejections of the claims have been withdrawn.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DEREK S. CHAPEL whose telephone number is (571)272-8042. The examiner can normally be reached on M-F 8:30am-5:00pm.
